Transport Capabilities

Company Profile

SICE is a multinational leader in the integration of technologies for infrastructure management. With more than **100 years of history**, it has become an international benchmark in the fields of water management, civil engineering, transport, and mobility.

At SICE, we develop state-of-the-art integrated solutions and applications based on data science and artificial intelligence technologies.

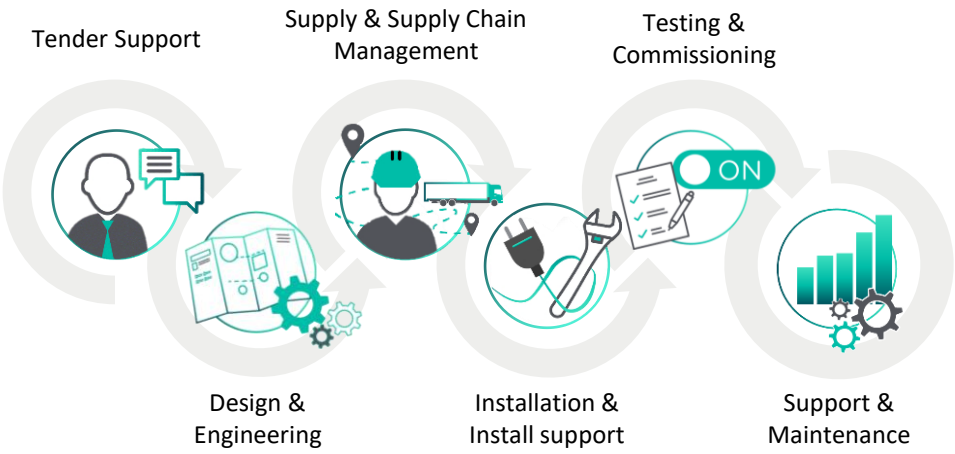
A global group with long local expertise

With offices in Melbourne, Sydney, and Auckland, and a team of **over 280 people**, SICE ANZ has steadily and profitably expanded its operations for almost 20 years.

SICE

Delivery Model

SICE delivers **comprehensive end-to-end operational** technology and engineering services across the entire project lifecycle, from concept to operation and beyond.



- **Tender Support**
  Early technical input and optimised solutions to strengthen submissions and reduce risk.
- **Design & Engineering**
  High-quality, compliant designs optimised for efficient delivery and long-term performance.
- **Supply & Supply Chain Management**
  Timely, compliant delivery through effective procurement and coordination.
- **Installation & Install Support**
  Hands-on delivery and oversight to ensure quality and design alignment.
- **Testing & Commissioning**
  Thorough systems testing before and after site deployment, de-risking site rollout and integration, and ensuring system readiness.
- **Support & Maintenance**
  Tailored support to maximise uptime, reliability, and asset life.

SICE

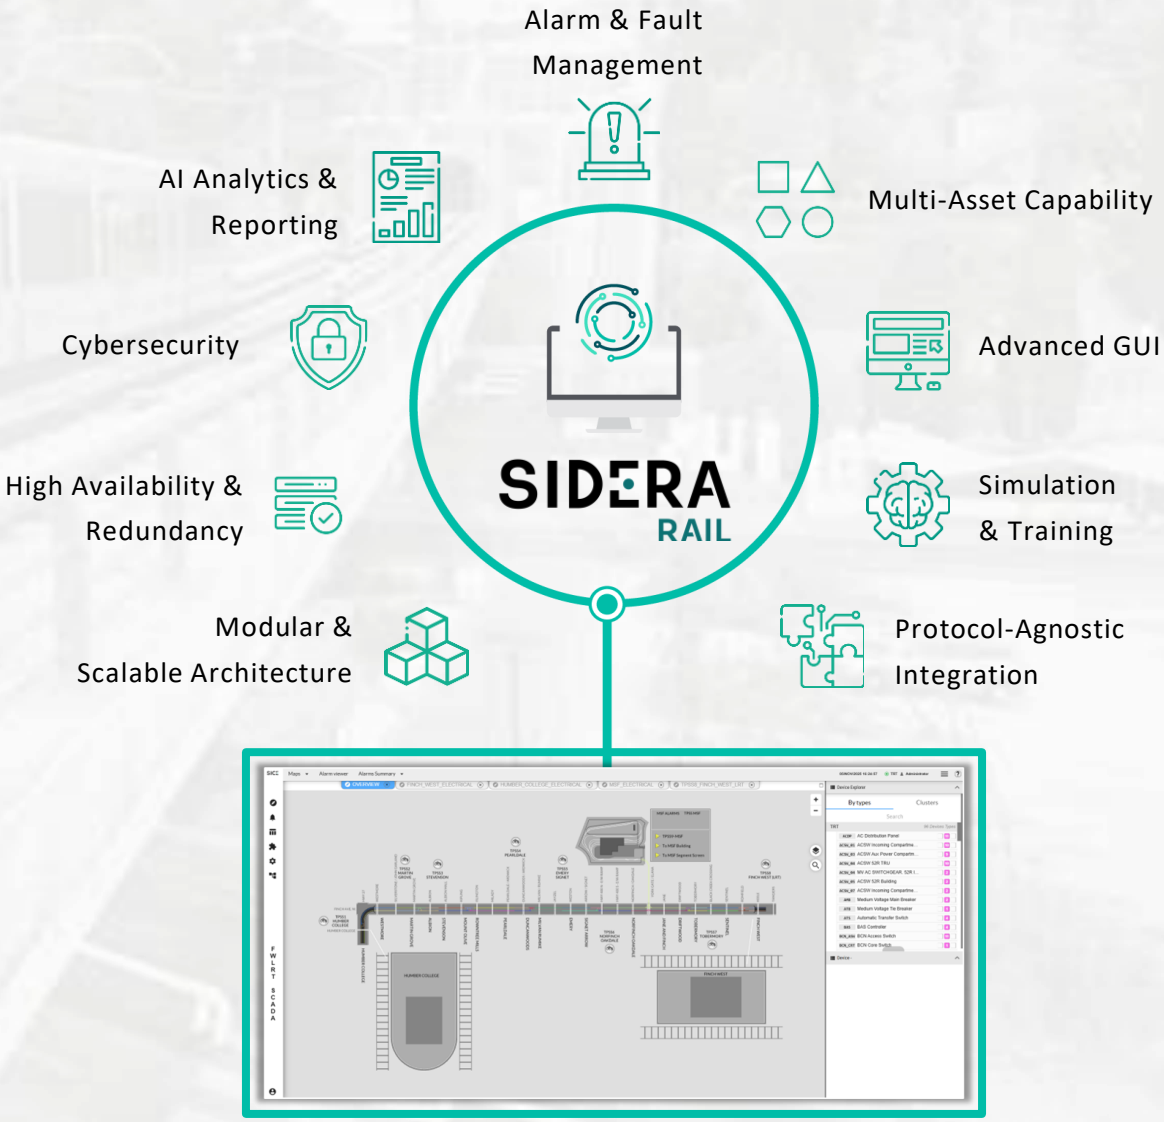
Addressing the evolving needs of public transportation.

As a technology integrator and engineering services provider, SICE offers **tailored technological solutions,** providing centralised management for all the services surrounding any public or private transport network, integrating different systems and solutions.

Whether modernising legacy networks or building new infrastructure, SICE delivers **flexible, future-ready solutions** fully tailored to each environment.

A robust, centralised platform to bring transport system management to a whole new level.

SIDERA Rail integrates user, system, and security management into one intuitive interface, **optimising control across trains, stations, and infrastructure**. Built on a modular, scalable architecture, it adapts to any network and delivers:



Communications Systems

- Data Comms Networks
- Wireless Networks
- Radio & Mobile Communications
- Cybersecurity

Security & Information Systems

- Access Control and Intruder Detection
- Surveillance and Incident Detection
- Passenger Information Systems
- AI & Data Analytics

Monitoring & Control Systems

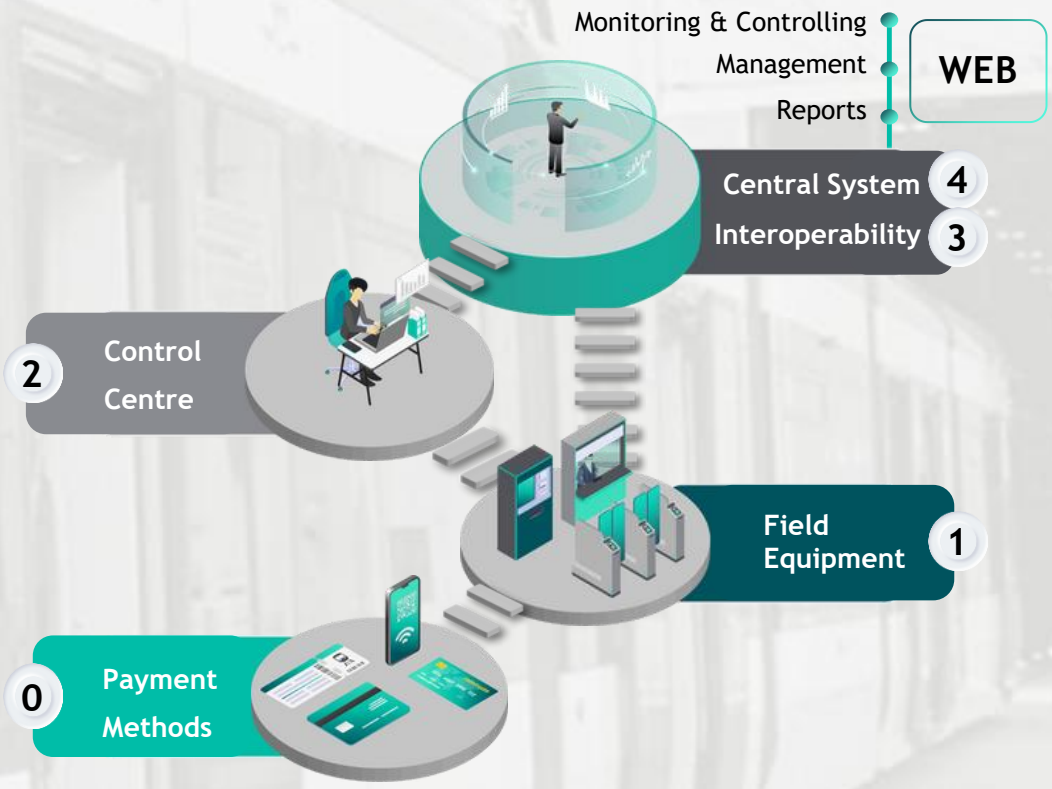
- Ventilation Systems
- Power Systems
- Fire Detection & Suppression Systems
- Building Management Systems
- Electrical Systems

SICE

Automatic Fare Collection

SICE's solutions combine flexible payment options, reliable equipment, and real-time control via a central platform, **SIDERA AFC**.

Designed for seamless integration and interoperability, it ensures **smooth, user-friendly journeys** across any network.



Onboard train solutions

We deliver fully integrated onboard systems, including CCTV, Passenger Information, Public Address, and Radio Communications (TETRA, LTE-R, FRMCS).

SIDERA links all these systems, enabling operators to manage the **entire rail network from a single platform**, connecting stations, tunnels, and rolling stock.

Buses, metro and railways

Global reach, local impact

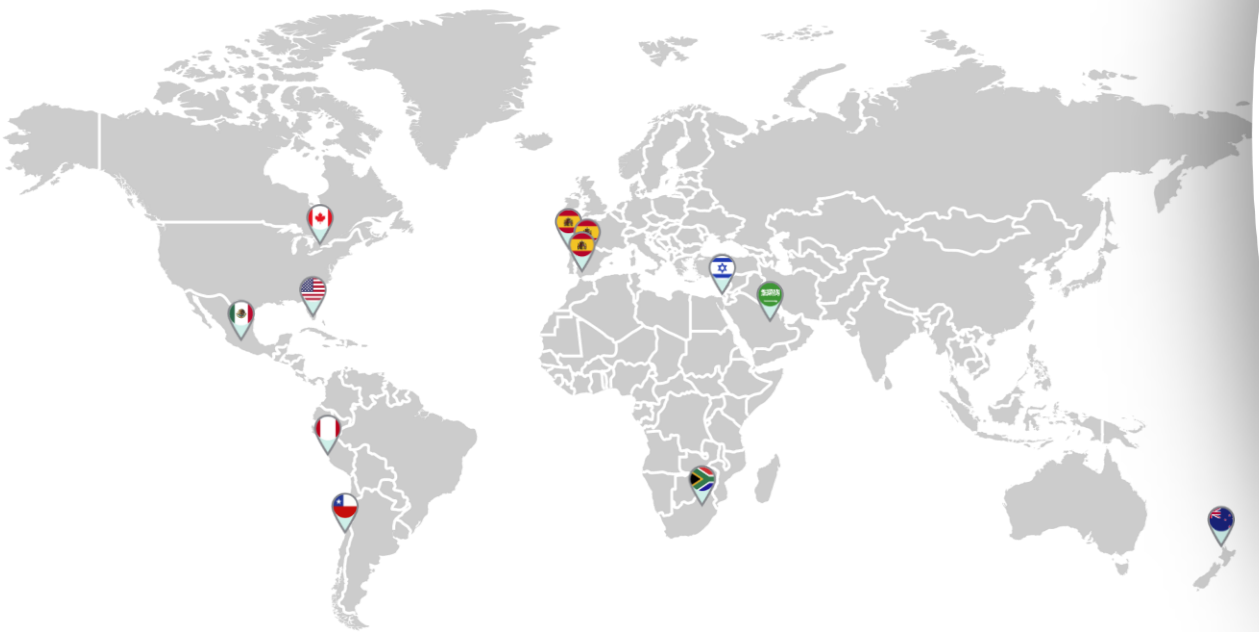
MORE THAN

800 TRAINS

400 STATIONS

1000 BUSES

Equipped with SICE Technology



SICE technology powers **safe, efficient, and connected journeys** across global transit networks, supporting millions of passengers daily.

SICE

Trusted by Leading Operators Worldwide

With over two decades of proven delivery in the ANZ region and **global experience** spanning Europe, Asia, and the Americas, SICE has become a **trusted partner** to rail and transit operators worldwide.
